

BOILER FEED PUMP - 3-1/4" 6TPI Whit Tools

As well as manufacturing its own tools for use on Boiler Feed Pumps, Boltight refurbishes and repairs tools originally manufactured by other suppliers.

Tools before refurbishment by Boltight

Tools after refurbishment by Boltight

Test pressure 1000

6 off 3-1/4" TPI WHIT boiler feed pump tools were refurbished. The refurbished tools were cleaned, chemically blacked and fitted with the latest Boltight composite seal, a new piston and hydraulic connector. Previously the customer, a power station, had experienced seal leakage, leakage from the connectors and severe problems returning the pistons after use.

When the new pistons and seals were fitted, the effort required to return the piston was greatly reduced, the reliability was improved and the leakage problems were eliminated.

Old piston and tyre seal taken from the 3-1/4 inch

Extensive extrusion damage to the seals

New piston and seal offering increased reliability and performance
