

Power Press 7in Hydraulic Nuts

At Boltight we design and manufacture hydraulic nuts for many different applications.

These large 7 inch nuts are destined for use on a very large Power Press. The four tie rods securing the press frame can be simultaneously tightened or released by connecting these four nuts together for simultaneous operation.

Boltight supplies all of the ancillary equipment, such as flexible hoses, quick disconnect couplings and the air driven hydraulic pump necessary to operate the hydraulic nuts.

Boltight manufactures a wide range of hydraulic nuts working at different pressures. These nuts operate at 1500 bar and develop 415 tons force each.

The nuts conform to the requirements of the new European Pressure Equipment Directive and are CE Marked. A comprehensive Health & Safety Operating and Instruction Manual accompanies all Boltight products, giving easy to follow step by step instruction in the safe use of the products.

Send application details to the address below and Boltight will respond with their best product offering to suit your bolt tightening requirements.
