BOLT+ Calculation Software

BOLT+ offers advanced support for your bolt tightening requirements. The software allows users to rapdily calculate required bolt tensioning pressures based on standard flange information. The software also gives tooling recommendations based on the information provided.

BOLT+ is designed to be simple and quick to use, requiring minimal user input. It can provide procedures and support documentation for multiple jointed projects and is customisable to special applications or tools.

It is available in a browser based format at *http://www.boltplus.com* or it is available on a CD for offline use. There are also modules to support other brands of tensioners or torque products. To request a CD or for more information about **BOLT+** and the other available modules please don't hesitate to contact us.

Standard Flange Data

The **BOLT+** software contains data for the following standard flanges:

ANSI B16.5
MSS SP-44
API 6A
API 17SV
SPO/Norsok L-005

Benefits

- Easy management of flanged connections.
- Quick calculation of bolt stress and pressure values.
- 24 Hour support.
- Minimal user input required.
- Customisable to special applications and tools.
- Includes data on all common flanges.
