

Compressor Bolt Tensioning

Compressor bolting is quickly and accurately tensioned to very high pre-loads using customised tooling designed and manufactured by Boltight.

Boltight bolt tensioners provide unparalleled durability, safety and ease-of-use, and are engineered using the latest materials technology and Finite Element Analysis techniques to provide the optimum solution for compressor bolt tightening.

Boltight has an extensive and varied supply history to various Power Generation, Rotating Heavy Plant and Compressor manufacturers (including GE, Peter Brotherhood, Elliot Turbomachinery, Siemens, Dresser Rand etc.). Experience dictates that Boltight is the preferred supplier to these industries as a result of our vast experience and design expertise, complemented by our exceptional product support and customer service.

As an ISO 9001:2008 accredited company, Boltight guarantees that all tensioning equipment conforms to the requirements of the European Pressure Equipment Directive and is CE Marked. A comprehensive Health & Safety Operating and Instruction Manual accompanies all Boltight tensioning equipment, providing easy to follow step-by-step instructions ensuring safe usage of the product.
